Volume 4 of 4 - Product, Bangel Construct, White Paper, and Portfolio Candidate Register

Entries in this volume: 3,824.

Each row is a granular candidate observation point, not a distinct invention or approved claim.

The full JSON/JSONL/CSV register contains detailed technical theses, disclosure prompts, search terms, enablement gaps, risk flags, and actions.

Use the point ID to cross-reference the machine-readable register and the Pink Paper / Batch documents.

Triage scores are internal reading aids only and must not be used as patentability, ownership, valuation, or legal conclusions.

Volume 2 of 4 - Formula, Algorithm, Physics, and Engineering Candidate Register

Entries in this volume: 2,900.

Each row is a granular candidate observation point, not a distinct invention or approved claim.

The full JSON/JSONL/CSV register contains detailed technical theses, disclosure prompts, search terms, enablement gaps, risk flags, and actions.

Use the point ID to cross-reference the machine-readable register and the Pink Paper / Batch documents.

Triage scores are internal reading aids only and must not be used as patentability, ownership, valuation, or legal conclusions.
