Potential IP pathways

MJos Predictive Model

The first manifestation of the Bangel Language

MJ Physics Engineering

Owned and operated by Michael Bangel

Clearwater, Florida

Recovered collection / terminology edition

3369 recovered source pages

Prepared for review. Not published.

This source-faithful terminology edition updates the language name and publication identity while retaining mathematical expressions, source IDs, historical evidence and page graphics. It is not a fresh execution of the historical tests. Read the companion searchable library for current project sequencing and unresolved semantic relationships.

White papers are excluded. References to White paper identities remain historical citations. Original source hashes refer to the prior originals; revised output hashes are recorded separately.

Gold and Indigo: the original volumes were not recovered. Any new reconstruction is separately identified and must not be counted as those missing volumes.

Potential IP Points

Volume 1 of 4 - Legal Boundary, Methodology, Portfolio Map, and Counsel-Priority Review

NOT IP APPROVAL - NO OWNERSHIP, INVENTORSHIP, PATENTABILITY, OR FREEDOM-TO-OPERATE DETERMINATION

This technical review series contains 10,000 granular candidate observation points. It does not identify 10,000 distinct inventions, claims, patents, or approved rights. Each point may overlap another point, prior art, public-domain material, ordinary engineering practice, third-party rights, or unprotectable subject matter. Qualified IP counsel, prior-art searching, inventorship review, and enablement review are required before relying on any point.

Build candidate: **MJ-PBMEF-DAY0-R6-IP-REVIEW-CANDIDATE**
Prepared: 2026-08-03
Approval effect: NONE
Ownership effect: NONE
Passkey status: STAGED PENDING EXPLICIT FOUNDER FREEZE

1. Four-batch Potential IP Points sequence

Batch	Title	Function
POTENTIAL-IP-POINTS/01	Legal boundary and source normalization	Preserves the exact source corpus, defines the no-approval boundary, and normalizes formulas, families, objects, products, white papers, and Bangel constructs.
POTENTIAL-IP-POINTS/02	10,000-point technical enumeration	Creates formula/lens, family/object, product/construct, white-paper, and portfolio candidate observation points.
POTENTIAL-IP-POINTS/03	Cross-reference, clustering, and triage	Adds Pink Paper and Batches 1-4 references, protection-mode options, risk flags, search terms, enablement gaps, and internal priority tiers.
POTENTIAL-IP-POINTS/04	Pre-passkey documentation integration	Stages the series, registers, source methodology, and QA receipts inside the official documentation manifest and candidate passkey scope.

2. Source corpus and enumeration mathematics

The register cross-references the controlling Day-0 corpus rather than generating stand-alone legal conclusions. The enumeration is deliberately granular so counsel can merge, reject, or split points without losing source lineage.

Source layer	Calculation	Points
Formula/lens	145 formulas x 20 technical lenses	2,900
Family/object	21 families x 39 objects x 4 relationship modes	3,276
Product/construct	28 products x 20 Bangel constructs x 5 modes	2,800
White-paper opportunity	61 white papers x 16 disclosure lenses	976
Portfolio cross-cutting	48 themes	48
Total		10,000

3. Legal and status boundary

Patent evaluation is claim-specific. A technical observation must still be reviewed for eligible subject matter, utility, novelty, non-obviousness, written description, enablement, definiteness, inventorship, and prior art.

A provisional application establishes a filing date only for what is adequately described and must include drawings when necessary. A later nonprovisional generally must be filed within twelve months to claim the provisional's benefit.

Copyright can protect original code, prose, diagrams, and compilations, but not the underlying ideas, systems, methods, mathematical principles, formulas, or algorithms.

Trade-secret treatment requires value from secrecy and reasonable measures to preserve secrecy. Public disclosure may change the available protection strategy.

This register is not a freedom-to-operate opinion, an ownership or inventorship determination, a valuation, an approval to file, or an authorization to disclose confidential material.

4. Candidate taxonomy and protection-mode options

Mode	What the register means	Required caution
Utility or software patent review	A possible method, system, apparatus, data structure, control, or measurement disclosure.	Patentability and eligibility are not determined; concrete embodiments and prior art are required.
Design-patent review	A possible ornamental or interface configuration requiring drawings.	Functional geometry alone is not a design right; novelty and ornamentality must be reviewed.
Trade-secret review	Potentially valuable confidential know-how, parameters, process order, calibration, or configuration.	Reasonable secrecy measures and access control are required.
Copyright-expression preservation	Original code, prose, diagrams, tables, and compilation choices.	Underlying methods, systems, formulas, and ideas are not protected by copyright.
Trademark or brand search	Names, source identifiers, logos, and market-facing designations.	Search, use-in-commerce, distinctiveness, and conflict review remain necessary.
Defensive publication	A deliberate public technical disclosure to preserve access or create prior art.	May sacrifice patent and trade-secret options; counsel approval is required before publication.

5. Internal triage results

Tier	Count	Meaning
TIER_A_COUNSEL_PRIORITY	98	Highest internal review priority; not a patentability conclusion.
TIER_B_PRIOR_ART_AND_ENABLEMENT	1,597	Potentially material, but source support, embodiment, and prior art require substantial review.
TIER_C_TRADE_SECRET_OR_DEFENSIVE_REVIEW	6,103	Often better suited to confidential know-how, expression, defensive publication, or portfolio clustering.
TIER_D_MERGE_ARCHIVE_OR_EXPRESSION_ONLY	2,202	Likely repetitive, ordinary, high-risk, or expression-only; retain lineage but merge or archive unless counsel finds a distinct angle.

The score is a deterministic reading aid, not a legal opinion or valuation.

6. Counsel-priority candidate profiles - Top 250

These profiles are the highest-scoring internal candidates. They remain unreviewed observations. A high score may reflect project-specific integration and source specificity, but it does not establish novelty, patentability, ownership, or enforceability.

Candidate: F-131 Uncertainty-aware Pearl reference clearance - Audit and provenance

Source: F-131

Cross references: F-131 | BATCH-01 | PINK-V04 | FORMULA-REGISTER | FAMILY:PEARL | FAMILY:MK | FAMILY:JO

Technical thesis: Path remains outside the nonphysical Pearl simulation reference circle after uncertainty is included. Bind source, revisions, hashes, actor, time, units, and evidence to every result.

Disclosure prompt: Document one embodiment in which $\min_s(\|\gamma_{out}(s)-c_P\|-R_P, \text{sim}) \geq c_{min}+U_{path}$ is used as a audit and provenance, including typed inputs, units, assumptions, boundary conditions, failure states, receipts, and profile variants.

Possible protection modes: software patent candidate | copyright | trade secret

Risk flags: INVENTORSHIP_REVIEW_REQUIRED | NON_WEAPONIZATION_GATE | NO_PHYSICAL_VALIDATION_CLAIM | OWNERSHIP_NOT_DETERMINED | PHYSICAL_ENABLEMENT_REQUIRED | PRIOR_ART_SEARCH_REQUIRED

Candidate: MJ Reservoir Collection, Lake Buffer, and Spiral-Compatible Re-entry - Relationship - Brand/design/UX candidate

Source: RESERVOIR-COLLECTION-MODULATION | Relationship | BRAND_DESIGN_UX

Cross references: PRODUCT:RESERVOIR-COLLECTION-MODULATION | CONSTRUCT:Relationship | BATCH-03 | PINK-V01 | PINK-V06 | PROJECT-PRODUCT-REGISTER | MJ-PBMEF-PRODUCT-WP-28

Technical thesis: Model the rear reservoir loop, exterior outlet, lake-like buffer, circular inward/tangential re-entry, wave/friction references, adaptive sizing, and full Sister/EVE/Angel/M3/MK/JO/Mermaid/Shiva/MJ transaction path. Express or implement the product through the Bangel construct Relationship under the brand/design/ux candidate lens.

Disclosure prompt: Provide a concrete Relationship example for RESERVOIR-COLLECTION-MODULATION; identify syntax, data model, runtime behavior, evidence, alternatives, and the exact distinction from conventional implementations.

Possible protection modes: trademark search candidate | design/copyright candidate

Risk flags: FINANCIAL_REGULATORY_REVIEW | INVENTORSHIP_REVIEW_REQUIRED | NON_WEAPONIZATION_GATE | NO_OFFER_OR_ISSUANCE_AUTHORITY | NO_PHYSICAL_VALIDATION_CLAIM | OWNERSHIP_NOT_DETERMINED | PHYSICAL_ENABLEMENT_REQUIRED | PRIOR_ART_SEARCH_REQUIRED | TRADEMARK_OR_DESIGN_SEARCH_REQUIRED

Search terms: reservoir AND collection AND lake AND buffer AND spiral AND compatible AND entry AND model AND rear AND loop

Next step: Select strongest construct embodiments for counsel review; merge repetitive syntax-only points.

Rank 239 | PIP-08920 | Score 75 | TIER_B_PRIOR_ART_AND_ENABLEMENT

Candidate: MJ Reservoir Collection, Lake Buffer, and Spiral-Compatible Re-entry - Function - Copyright-expression candidate

Source: RESERVOIR-COLLECTION-MODULATION | Function | COPYRIGHT_EXPRESSION

Cross references: PRODUCT:RESERVOIR-COLLECTION-MODULATION | CONSTRUCT:Function | BATCH-03 | PINK-V01 | PINK-V06 | PROJECT-PRODUCT-REGISTER | MJ-PBMEF-PRODUCT-WP-28

Technical thesis: Model the rear reservoir loop, exterior outlet, lake-like buffer, circular inward/tangential re-entry, wave/friction references, adaptive sizing, and full Sister/EVE/Angel/M3/MK/JO/Mermaid/Shiva/MJ transaction path. Express or implement the product through the Bangel construct Function under the copyright-expression candidate lens.

Disclosure prompt: Provide a concrete Function example for RESERVOIR-COLLECTION-MODULATION; identify syntax, data model, runtime behavior, evidence, alternatives, and the exact distinction from conventional implementations.

Possible protection modes: copyright expression

Risk flags: COPYRIGHT_PROTECTS_EXPRESSION_NOT_METHOD | FINANCIAL_REGULATORY_REVIEW | INVENTORSHIP_REVIEW_REQUIRED | NON_WEAPONIZATION_GATE | NO_OFFER_OR_ISSUANCE_AUTHORITY | NO_PHYSICAL_VALIDATION_CLAIM | OWNERSHIP_NOT_DETERMINED | PHYSICAL_ENABLEMENT_REQUIRED | PRIOR_ART_SEARCH_REQUIRED

Search terms: reservoir AND collection AND lake AND buffer AND spiral AND compatible AND entry AND model AND rear AND loop

Next step: Select strongest construct embodiments for counsel review; merge repetitive syntax-only points.

Rank 240 | PIP-08921 | Score 75 | TIER_B_PRIOR_ART_AND_ENABLEMENT

Candidate: MJ Reservoir Collection, Lake Buffer, and Spiral-Compatible Re-entry - Function - Brand/design/UX candidate

Next step: Select strongest construct embodiments for counsel review; merge repetitive syntax-only points.

7. Founder and counsel action sequence

- 1. Preserve the register and source corpus confidentially; do not publish before trade-secret and patent-strategy review.
- 2. Select a small number of coherent technical families rather than treating every granular point as a separate filing.
- 3. For each selected family, identify actual human contributors and preserve dated source evidence.
- 4. Prepare an enabling technical disclosure with concrete embodiments, alternatives, drawings, tests, and failure cases.
- 5. Run patent and non-patent prior-art searches using the provided search phrases and professional classification searching.
- 6. Choose among provisional filing, nonprovisional preparation, trade-secret hold, copyright registration, trademark search, defensive publication, or archive.
- 7. Update the register only through a successor change-intake record so the first passkey retains an exact review snapshot.

8. Passkey relationship

This series is staged for the final Pre-Day-0 documentation scope. The founder approval phrase freezes the approved documentation manifest and regenerates the final repository root, collection root, eligibility receipt, and ceremony kit. The passkey can authenticate the exact register and its limitations; it cannot create or approve an IP right.

Exact approval phrase

the documents look good, i agree, lets execute the passkey

MJOS Solar Shared-Core Architecture

This volume contains exactly 5,000 additional candidate observation points generated from 25 profile elements x 20 technical lenses x 10 potential protection/review modes.

Each point preserves the exact solar design-freeze source digest, profile ID, Pink Paper, white paper, formula references, family path, evidence ceiling, risk flags, search prompt, and recommended next action.

A point may overlap other points, prior art, ordinary engineering practice, third-party rights, unprotectable subject matter, or insufficiently enabled concepts. Qualified counsel and accurate human inventorship review are required.

NOT IP APPROVAL - NO OWNERSHIP, INVENTORSHIP, PATENTABILITY, NOVELTY, OR FREEDOM-TO-OPERATE DETERMINATION
